Tutorial for Verification Interface

Step 1: Generate Files

Navigate to the Generate Dataset & Receipt tab.

Qualtrics Verification Tool

Generate Dataset & Receipt

Verify Dataset

Generate Signed Dataset

Enter Qualtrics Survey ID

Generate Files

[Plotly Cloud](#) [Errors](#) [Callbacks](#) | **v4.1.0** [Dash update available - v4.2.0](#) | **Server**  

Step 2: Enter a Survey ID

Enter the Survey ID associated with your Qualtrics survey.

Qualtrics Verification Tool

Generate Dataset & Receipt

Verify Dataset

Generate Signed Dataset

SV_b9hwyAmbTIK4RD0

Generate Files

[Plotly Cloud](#) [Errors](#) [Callbacks](#) | **v4.1.0** [Dash update available - v4.2.0](#) | **Server**  

Step 3: Generate the Signed Files

Click Generate Files. The system will create a canonical dataset and a receipt.

The screenshot displays the 'Qualtrics Verification Tool' interface. At the top, there are two tabs: 'Generate Dataset & Receipt' (active) and 'Verify Dataset'. Below the tabs, the heading 'Generate Signed Dataset' is centered. A text input field contains the identifier 'SV_b9hwyAmbTtK4RD0'. Below this field is a blue button labeled 'Generate Files'. Underneath the button, a green success message states 'Files Generated Successfully' and 'Survey SV_b9hwyAmbTtK4RD0 was processed.' At the bottom of the main content area, there are two buttons: 'Download Dataset' (green) and 'Download Receipt' (blue). The footer of the interface includes links for 'Plotly Cloud', 'Errors', 'Callbacks', the version 'v4.1.0', a note 'Dash update available - v4.2.0', a 'Server' status indicator with a green checkmark, and a refresh icon.

Step 4: Download the Files

Download both the dataset and [receipt](#) files.

Verify Dataset

Plotly Cloud Errors Callbacks v4.1.0 Dash update available - v4.2.0 Server

Step 6: Upload the Dataset

Drag and drop or click to upload the downloaded dataset and receipt files.

A green highlight indicates that the file has been successfully selected.

The image displays two screenshots of the Qualtrics Verification Tool interface, illustrating the process of uploading a dataset and receipt file.

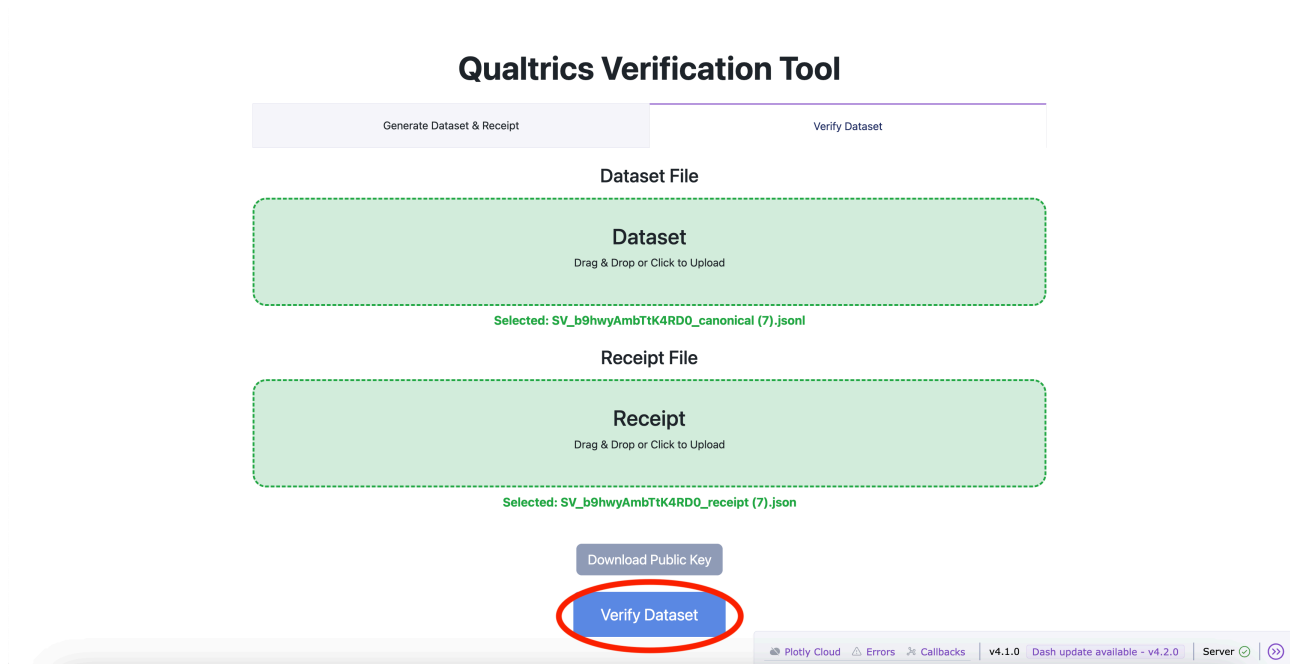

Top Screenshot: The interface shows the 'Qualtrics Verification Tool' title. Below the title are two tabs: 'Generate Dataset & Receipt' (selected) and 'Verify Dataset'. Under the 'Generate Dataset & Receipt' tab, there are two sections: 'Dataset File' and 'Receipt File'. The 'Dataset File' section contains a green dashed box labeled 'Dataset' with the text 'Drag & Drop or Click to Upload'. Below this box, it says 'Selected: SV_b9hwyAmbTtK4RD0_canonical (7).jsonl'. The 'Receipt File' section contains a light blue dashed box labeled 'Receipt' with the text 'Drag & Drop or Click to Upload'. Below these sections are two buttons: 'Download Public Key' and 'Verify Dataset'.

Bottom Screenshot: This screenshot shows the same interface, but the 'Verify Dataset' tab is now selected. The 'Dataset File' section still shows the 'Dataset' box with the text 'Drag & Drop or Click to Upload' and 'Selected: SV_b9hwyAmbTtK4RD0_canonical (7).jsonl'. The 'Receipt File' section now shows a green dashed box labeled 'Receipt' with the text 'Drag & Drop or Click to Upload' and 'Selected: SV_b9hwyAmbTtK4RD0_receipt (7).json'. The 'Download Public Key' and 'Verify Dataset' buttons are still present.

Step 7: Verify the Dataset

Click Verify Dataset.

The verification tool will compare the uploaded dataset against the cryptographic signature stored in the receipt.

The image shows the Qualtrics Verification Tool interface. It has two tabs: 'Generate Dataset & Receipt' and 'Verify Dataset'. The 'Verify Dataset' tab is active. Under 'Dataset File', there is a green dashed box labeled 'Dataset' with the text 'Drag & Drop or Click to Upload'. Below it, it says 'Selected: SV_b9hwyAmbTtK4RD0_canonical (7).jsonl'. Under 'Receipt File', there is a green dashed box labeled 'Receipt' with the text 'Drag & Drop or Click to Upload'. Below it, it says 'Selected: SV_b9hwyAmbTtK4RD0_receipt (7).json'. At the bottom, there is a 'Download Public Key' button and a 'Verify Dataset' button, which is circled in red. The footer contains links for 'Plotly Cloud', 'Errors', 'Callbacks', version 'v4.1.0', a 'Dash update available - v4.2.0' notification, a 'Server' status indicator, and a refresh icon.

Step 8: Successful Verification

If the dataset has not been modified, the tool will display:

✓ Verification Successful. The signature matches the data.

This confirms that the dataset is authentic and unchanged.

Download Public Key

Verify Dataset

✓ Verification Successful. The signature matches the data.

Step 9: Failed Verification

If either the dataset contents have been modified or the receipt/signature has been altered, the tool will display X Verification Failed. The signature does not match the data.

This indicates that the dataset can no longer be verified against the original signed version.

Definitions

Public Key

The public key is used to verify that a receipt was signed by Witness.

Receipt

The receipt contains the cryptographic signature generated for a dataset.

Canonical Dataset

The canonical dataset is the normalized version of the survey responses that is used when generating the signature.
