Tutorial for LLM Provenance

Single Prompt

Batch Processing

Step 1: Enter Your Researcher ID

In the Researcher ID field, enter your assigned identifier.

LLM Provenance Logger
A research tool for tamper-evident recording of LLM API calls

WORKFLOW MODE
Choose a workflow
Single Prompt

CONFIGURATION
Researcher ID
temp_id
Your identifier for grouping logs. Stored in your browser; never sent to anyone except this local server.

OpenRouter API Key
.....
Your key is never stored. It is used only for this request and stays in your browser.

Model
GPT-5.5

Temperature
0.7
0 = deterministic, 2 = most creative

Max Tokens
(model default)
Leave blank to use the model's default

INPUT
Prompt / Input
Enter the text you want to send to the model...

Step 2: Enter Your API Key

Paste your OpenRouter API key into the OpenRouter API Key field.

LLM Provenance Logger

WORKFLOW MODE
Choose a workflow
Single Prompt

CONFIGURATION
Researcher ID
temp_id
Your identifier for grouping logs. Stored in your browser; never sent to anyone except this local server.

OpenRouter API Key
.....
Your key is never stored. It is used only for this request and stays in your browser.

Model
GPT-5.5

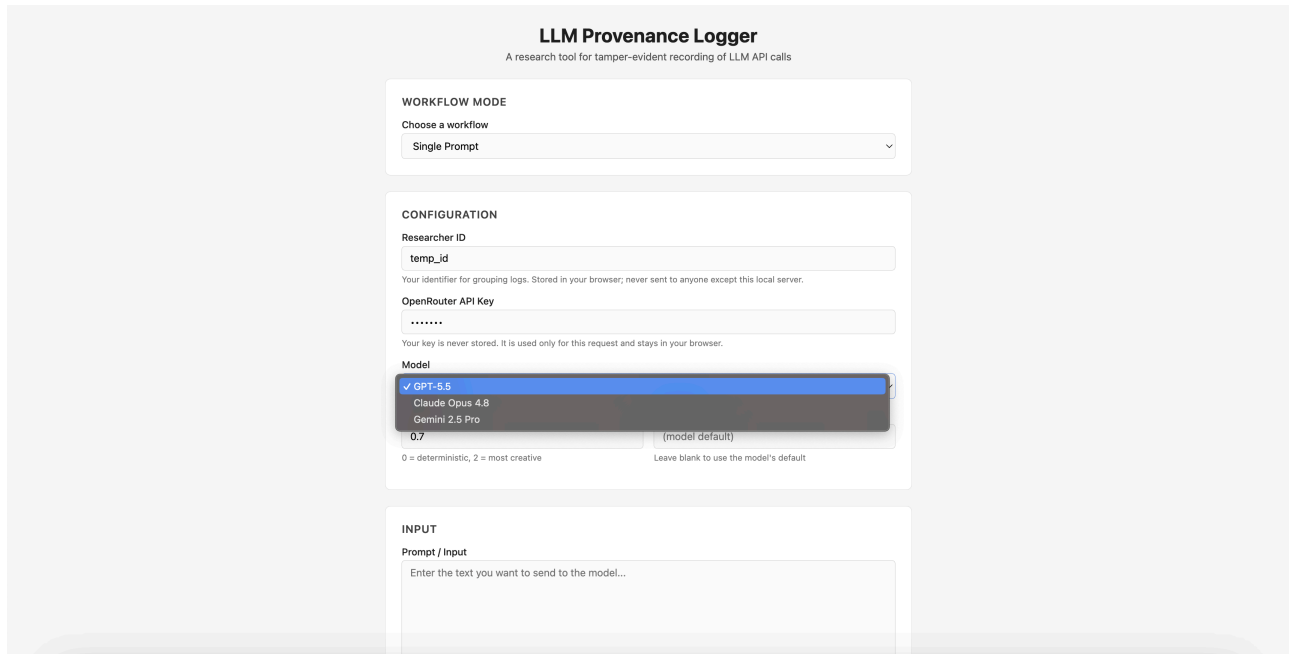

Temperature
0.7
0 = deterministic, 2 = most creative

Max Tokens
(model default)
Leave blank to use the model's default

INPUT
Prompt / Input
Enter the text you want to send to the model...

Step 3: Select a Model

Choose the AI model you would like to use.

The screenshot displays the 'LLM Provenance Logger' interface, which is a research tool for recording LLM API calls. The interface is divided into three main sections: 'WORKFLOW MODE', 'CONFIGURATION', and 'INPUT'.

- WORKFLOW MODE:** A dropdown menu labeled 'Choose a workflow' with 'Single Prompt' selected.
- CONFIGURATION:**
 - Researcher ID:** A text input field containing 'temp_id'.
 - OpenRouter API Key:** A text input field with masked characters '.....'.
 - Model:** A dropdown menu with 'GPT-5.5' selected. The dropdown list shows 'Claude Opus 4.8' and 'Gemini 2.5 Pro' as other options.
 - Temperature:** A slider input field set to '0.7'. Below it, a note states '0 = deterministic, 2 = most creative'.
 - Model Default:** A button labeled '(model default)'.
- INPUT:** A section titled 'Prompt / Input' with a text area for entering the text to be sent to the model.

Step 4: Choose Optional Settings

1. Temperature.
2. Max Tokens.

RESUME A JOB

What is a Job ID? When you submit a query, the server immediately returns a Job ID and processes your request in the background. If you close this tab before the result is ready, you can paste your Job ID here to retrieve the result — as long as the server is still running. Your most recent Job ID is saved automatically in your browser.

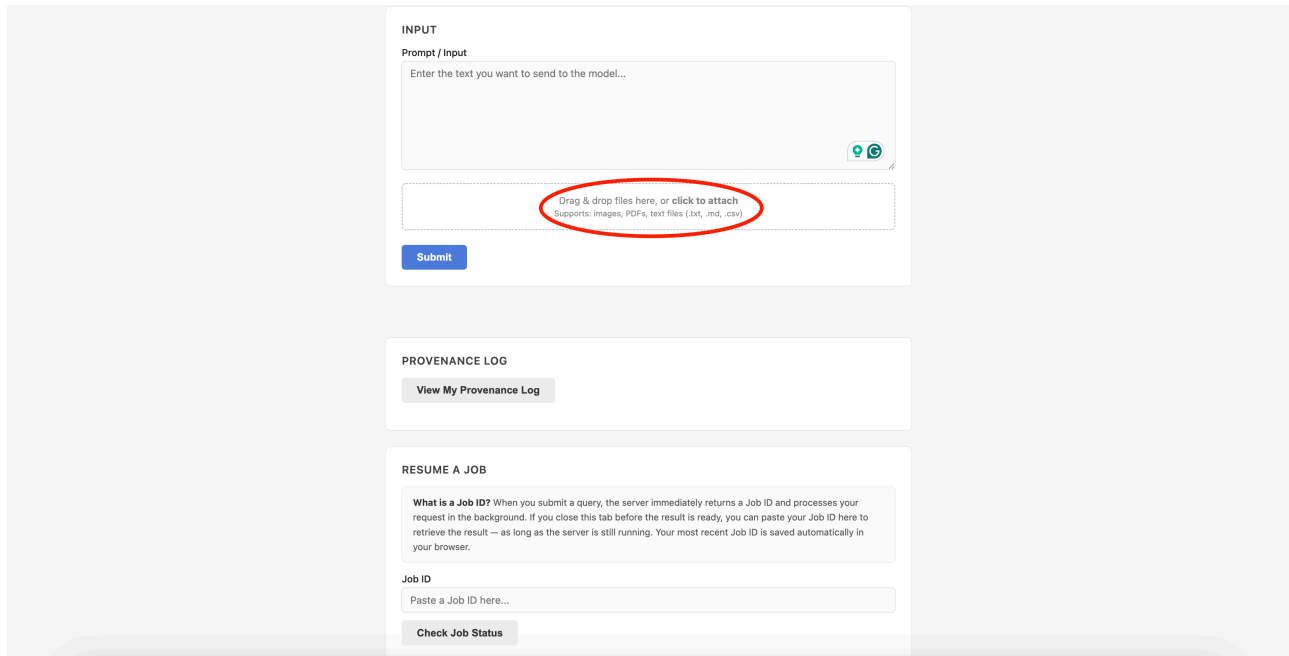

Job ID

Paste a Job ID here...

Check Job Status

Step 6: Attach AnySupporting Files

If your task requires additional materials, you may upload files.

The screenshot displays a web interface with three main sections. The top section, titled 'INPUT', contains a text area for a 'Prompt / Input' and a file upload area. The file upload area is highlighted with a red circle and contains the text 'Drag & drop files here, or click to attach' and 'Supports: images, PDFs, text files (.txt, .md, .csv)'. Below the input section is a 'Submit' button. The middle section, titled 'PROVENANCE LOG', contains a 'View My Provenance Log' button. The bottom section, titled 'RESUME A JOB', contains a 'What is a Job ID?' explanation, a 'Job ID' input field, and a 'Check Job Status' button.

Step 7: Submit Your Request

Click Submit.

After submitting, a Job ID will be displayed. This Job ID can be used to retrieve your result later if needed.

INPUT

Prompt / Input

Provide a random number between 1 and 10.

Drag & drop files here, or click to attach
Supports: images, PDFs, text files (.txt, .md, .csv)

Submit

Your request is running in the background. This page will update automatically when the result is ready — you do not need to stay here. If you close this tab, paste your Job ID into the Resume a Job section below to retrieve your result later. Jobs are stored in the server's memory and will be lost if the server restarts.)

Resuming a Previous Job

If you close the page before a request finishes processing, you can retrieve it later using the Job ID.

If the job has completed and is still available, the result and provenance record will be displayed.

The screenshot shows a web interface with three main sections:

- INPUT**: Contains a text input field with the prompt "Provide a random number between 1 and 10|". Below the input field is a file upload area with the text "Drag & drop files here, or click to attach" and "Supports: images, PDFs, text files (.txt, .md, .csv)". A blue "Submit" button is located below the file upload area.
- PROVENANCE LOG**: Contains a button labeled "View My Provenance Log" and the text "No records yet."
- RESUME A JOB**: Contains a text box explaining the Job ID: "What is a Job ID? When you submit a query, the server immediately returns a Job ID and processes your request in the background. If you close this tab before the result is ready, you can paste your Job ID here to retrieve the result — as long as the server is still running. Your most recent Job ID is saved automatically in your browser." Below this text box is a text input field containing the Job ID "e8633d2a-f34-4497-8192-82a95f1e04f8". A button labeled "Check Job Status" is located below the Job ID input field and is highlighted with a red circle.
